Get recognized for your building's commitment to sustainability through the USGBC Tennessee IMPACT Benchmarking Challenge! Using the Arc performance platform, buildings will set a score for energy, water, and waste by June 30, 2019. Participating buildings will have until December 15, 2019 to improve their score in one or all categories. The buildings showing the highest scores at the end of the competition will be celebrated at next year's USGBC Tennessee IMPACT conference!

It's easy to participate: <https://tinyurl.com/IMPACTbenchmarking>

Register your building in [Arc](#). Any building may participate! Access to Arc is free for competition participants. Upload data by June 30, 2019.

Save energy, water, and waste! Engage occupants & building managers in improving your scores. Update your data by December 15, 2019.

Buildings with the highest energy, water, waste and overall Arc scores at the end of the competition will be honored at USGBC Tennessee's IMPACT conference in January 2020!
